

Lentor Gardens Residences

Video Build: Research Brief and Viral Reel Scripts

Winfred Quek | CEA R073319H

Prepared 16 Jun 2026 draft, nothing posted

Research Brief

generated_date: 2026-06-16
data_as_of: 2026-06-16
expires_date: 2026-06-30
project: Lentor Gardens Residences (Lentor Gardens GLS, District 26) — Intelligence + Targeting Brief
prepared_by: Crestbrick / Winfred Quek
purpose: Ground a viral video script. Factual accuracy critical. No invented numbers.

Lentor Gardens Residences — Verified Intelligence + Targeting Brief

Date: 2026-06-16
Confidence: MEDIUM-HIGH on confirmed project facts and comparable launch data (multiple independent sources: EdgeProp, 99.co, Stacked Homes, developer releases). LOW on Lentor Gardens own PSF and quantum, because official pricing has NOT been released. Preview is 4 July 2026. Every price figure below the launched comparables is labelled ESTIMATE or TBC.

0. Project confirmation (the truth layer)

The project the user calls "Lentor Garden Residences" is officially Lentor Gardens Residences, sitting on the Lentor Gardens GLS parcel in District 26.

CONFIRMED (developer schedule)

Launch PSF

NOT officially released. Analyst consensus band approx S\$2,100 to S\$2,350 psf
TBC / ESTIMATE

Unit mix and sizes — TREAT AS NOT FINAL. Sources disagree. Consensus is a family skewed mix weighted toward 3 to 5 bedroom units, with a smaller pool of 1 to 2 bedroom units, plus a limited collection of 3 strata landed homes (approx 1,346 sqft each) and 3 commercial shops. Exact unit counts and floor areas per bedroom type release at the 4 July preview. Do NOT state specific size ranges as fact on camera.

Indicative quantum by bedroom (ESTIMATE ONLY, derived from comparable Lentor PSF, not from the developer): roughly 2BR from approx S\$1.36m, 3BR from approx S\$1.84m, 4BR from approx S\$2.49m. These are analyst projections circulating pre launch. If quoted at all, they MUST be framed as "estimated, pending official pricing on 4 July."

Residences](<https://www.99.co/singapore/condos-apartments/lentor-gardens-residences>), [99.co Lentor Gardens GLS Parcel B](<https://www.99.co/singapore/condos-apartments/lentor-gardens>), [EdgeProp Lentor Gardens site released](<https://www.edgeprop.sg/property-news/lentor-central-gls-site-launched-sale-lentor-gardens-site-released>), [lentorcondos.com guide](<https://www.lentorcondos.com/guide/lentor-gardens-what-we-know-2026>)

1. Location and estate story

MRT and connectivity. Lentor MRT (TE5) sits on the Thomson East Coast Line, operational since Aug 2021. From Lentor it is roughly 6 stops to Orchard (about 20 minutes), with an interchange to the Circle Line at Caldecott and a future interchange to the Cross Island Line at Bright Hill. The TEL is the spine of the whole estate story: the corridor exists because the line made a former greenfield pocket off mature Ang Mo Kio newly accessible.

Source: [EdgeProp Lentor Hills

transformation](<https://www.edgeprop.sg/property-news/greenfield-growth-story-lentor-hills%E2%80%99transformation-burgeoning-private-residential-estate>)

The estate is real and maturing, not a paper masterplan. Eight GLS parcels released roughly 2021 to 2026, totalling an estimated 3,500-plus units. The anchor is Lentor Modern (GuocoLand), the only mixed use site, with a retail podium integrated directly with Lentor MRT via covered linkway. That retail spine (supermarket, F&B, childcare, clinics) is what converts the estate from a dormitory cluster into a self contained neighbourhood. Lentor Modern TOPed in Aug 2025, so the mall and the lived in estate are now an actual amenity, not a promise.

Schools. Verify final distances on the MOE School Finder before filming, since priority is per development, not per estate.

- Anderson Primary School — approx 0.7km (within the 1km Phase 2A priority band). CONFIRMED across sources.
- CHIJ St Nicholas Girls (Primary) — approx 1.1km, within the 2km band; this is a top tier, popular girls school and the single biggest family draw to the corridor. Some blocks may fall inside 1km; confirm per site.
- Presbyterian High School — approx 0.9km (secondary).
- Mayflower Primary — approx 1.3km.

Sources: cache cross check with [Wikipedia CHIJ St

Nicholas](https://en.wikipedia.org/wiki/CHIJ_Saint_Nicholas_Girls%27_School) and prior estate research. FLAG:

re-verify the 1km vs 2km band for Lentor Gardens Residences specifically on MOE School Finder before any catchment claim on camera.

Master plan and character. URA designated the area a new private residential precinct off mature Ang Mo Kio. It backs onto green: Lentor and Thomson nature corridors, with low rise landed enclaves nearby keeping density and sightlines softer than a typical city fringe launch.

2. Comparable Lentor launches — the price and absorption ladder

This is the strongest factual backbone for the script. The corridor has a clean, public track record of strong end user absorption.

analyst projection from approx S\$2,700

TBC

Land awarded at S\$1,278 psf ppr

What the ladder shows:

- Launch PSF has climbed from roughly S\$2,080 (2023) to S\$2,200 (2025), with the next major parcel (Plot 4) bought at S\$1,278 psf ppr versus Lentor Gardens at S\$920 psf ppr. That land cost gap is the central, verifiable fact in this entire brief.
- Absorption has been genuine and broad: even the weakest (Lentoria) cleared the bulk of stock over time, and the strongest (Lentor Central Residences) hit 93% in a weekend. This is an end user estate, roughly 90% Singaporean buyers per the Lentor Central Residences profile, with low speculative or foreign presence.
- Lentor Gardens enters as the 7th launch. The precinct is maturing, which is both the value case and the risk.

3. Target buyer segments (ranked)

1. North side HDB upgraders (PRIMARY). Owners in Ang Mo Kio, Bishan, Yishun, Sengkang reaching MOP, wanting a first private home without leaving familiar ground or schools. Core motivation: stay in the family neighbourhood, trade up to a brand new 99 year condo, keep the kids in the same schools. Budget band: roughly S\$1.4m to S\$2.2m, sweet spot 2BR to 3BR. This is the largest pool and the one the estate has been built around. (Capital: entry, gradual. Progression: HDB to private ladder.)
2. Schooling and multigen families. Buyers anchored by CHIJ St Nicholas and Anderson Primary, often with grandparents nearby for childcare. Core motivation: catchment proximity and larger family layouts. The skew of this project toward 3 to 5 bedroom units fits this segment directly. Budget band: roughly S\$1.8m to S\$3.0m-plus. (Protection: liveability, school certainty. Progression: family stability.)
3. TEL line rental investors. Buyers betting on rental demand from professionals along the TEL corridor and the future CRL interchange at Bright Hill. Core motivation: yield plus long horizon capital. HONEST CAVEAT: this is the most exposed segment. With 400-plus units across the estate TOPing 2026 to 2029, landlord competition will compress rents near completion. Lentor Modern (the only TOPed project) shows gross yields around 2.8 to 3.2%, which is modest. Budget band: roughly S\$1.35m to S\$1.8m, 1BR to 2BR for yield. (Cashflow: thin near term. Capital: the real thesis.)
4. Right sizers and second property buyers. Empty nesters or owners diversifying, drawn by the lower land cost entry and a quieter, lower rise, greener pocket. Budget band: roughly S\$1.6m to S\$2.4m. (Protection: defensive, lifestyle led.)

4. Purchase triggers and objections

Rational triggers:

- Lowest land cost in the estate (S\$920 psf ppr) gives the developer genuine room to price competitively versus peers that paid more.
- Proven, near sold out comparables on the same MRT stop de risk the location.

- TEL connectivity is live today, not a future promise; Lentor Modern mall is open today.
- School catchment with a genuinely sought after girls school.

Emotional triggers:

- "Stay in the north, finally go private" for AMK and Bishan families.
- Brand new versus an ageing resale HDB or older condo.
- A maturing estate you can already walk through, not a hoarding and an artist impression.
- The "last value entry before Plot 4 resets the corridor higher" narrative.

Top 5 objections from a sceptical buyer, with honest counters:

1. Price / "Lentor is already expensive." Honest counter: launch PSF here is TBC, but the developer bought land at S\$920 psf ppr versus S\$1,278 for the next parcel. That cost gap means a more competitive launch price is plausible, not guaranteed. Do not promise a number until 4 July.
2. Supply glut / "Too many Lentor condos." Honest counter: true, this is the 7th launch and 400-plus units TOP nearby in 2026 to 2029. But the prior 6 are roughly 93 to 100% sold, which is real absorption, not overhang. The risk is concentrated in rental timing, not in resale demand.
3. Leasehold / "Only 99 years." Honest counter: the entire estate is 99 year leasehold, so this is not a relative disadvantage versus its true competitors. Fresh tenure from 2025 means a full runway. The comparison set is other new 99 year launches, not freehold.
4. ROI / "Yields are thin." Honest counter: correct, Lentor Modern gross yield is around 2.8 to 3.2%, modest. The investment case here is capital appreciation across a maturing estate plus the land cost arbitrage, not cashflow. An honest investor frames this as a Capital and Progression play, not a yield play.
5. Timing and developer / "Why not wait, and who is Kingsford?" Honest counter, two parts. On timing: Plot 4 land cost (S\$1,278 psf ppr, projected to launch from around S\$2,700 psf by analysts) suggests the corridor reprices upward, so waiting may cost more, though that is a projection, not a fact. On developer: Kingsford has delivered 3,500-plus Singapore homes (Waterbay, Hillview Peak, Normanton Park) and won awards, BUT also has a documented quality and safety history, including a no sale licence on Normanton Park from Jan 2019 to Dec 2020. This is a legitimate concern to address head on, not bury. Counter is due diligence on build quality and snagging, plus the strong land cost basis.

Source: [Today via Pioneer Training, Kingsford no sale

licence](<https://www.pioneertraining.org/why-kingsford-developer-bought-normanton-park-en-bloc-blocked-selling-units-today-21042019>), [Kingsford corporate](<https://kingsford.com.sg/>)

5. The single most compelling, TRUE angle

"Same MRT stop, same schools, lowest land price in the corridor, and the next parcel on this line cost the developer 39% more for the land."

Every neighbouring Lentor project on the TEL TE5 stop is roughly 93 to 100% sold. Lentor Gardens Residences sits on that exact proven location but on the cheapest land the estate has ever seen at S\$920 psf ppr. The very next Lentor parcel was bought at S\$1,278 psf ppr, with analysts projecting launches from around S\$2,700 psf. So a north side buyer is looking at potentially the last competitively priced entry on a stop the market has already validated six times over, before the corridor resets higher.

Why it must be balloted, honestly: pricing is not yet public, so the urgency is structural (land cost basis plus a proven location plus an imminent upward reset on Plot 4), not a fabricated "selling fast" claim. Frame it as: the location risk has already been answered by six near sold out neighbours; the open question is only whether Kingsford prices to the land advantage, which you find out on 4 July.

This angle is fully grounded in verifiable land cost, sold out comparables, and confirmed TEL connectivity. It contains no invented PSF, no guaranteed return, and no appreciation figure.

Investor verdict (Winfred 4 Pillar frame)

- Capital: Strong thesis. Lowest land basis in a corridor that has repriced upward across six launches; Plot 4 sets a higher anchor.
- Cashflow: Weak to modest. Estate yields around 2.8 to 3.2% and rental competition peaks at TOP. Not a yield buy.
- Progression: Strong for HDB upgraders staying in the north; clean private ladder step with schools intact.
- Protection: Mixed. Liveable maturing estate and fresh lease are positives; developer quality history and 99 year tenure are the watch items.
- Hold period: Best framed as 7 to 10 years to ride estate maturation and Plot 4 repricing; flippers face thin near term yield and resale competition.

VERIFY BEFORE FILMING checklist (do not state these as fact until confirmed)

- [] Official launch PSF and price quantum by bedroom — releases at the 4 July 2026 preview. All current prices are ESTIMATES.
- [] Final unit mix, exact unit counts per bedroom, and floor areas — NOT confirmed; sources conflict on 1BR presence and the larger unit skew.
- [] Whether Lentor Gardens Residences falls within 1km or 2km of CHIJ St Nicholas and Anderson Primary — re-verify per development on MOE School Finder.
- [] Exact TOP date (Q1 2029 is an estimate).
- [] Confirm preview 4 Jul and booking 18 Jul 2026 dates are still current with the developer closer to launch.
- [] Lentor Central Plot 4 projected launch PSF (around S\$2,700) is an ANALYST projection, not a confirmed price — label it as such.
- [] If referencing the Kingsford quality history on camera, present it factually and balanced (delivered 3,500-plus homes AND the 2019 to 2020 no sale licence), do not exaggerate either way.

Next step: run portfolio-auditor on the client to see if this unit actually fits their 4-Pillar profile.

Viral Reel Scripts

Lentor Gardens Residences | Viral Reel Script Package (DRAFT)

Status: DRAFT for Winfred to film. Not published content.

Project: Lentor Gardens Residences (Lentor Gardens GLS site), District 26, near Lentor MRT (TE5) on the Thomson East Coast Line.

Developer: Kingsford (verify exact entity name before filming).

On screen identity required on every variant: Winfred Quek, CEA R073319H.

IMPORTANT compliance note for the whole package:

- Every number in this script is marked "verify". Confirm each figure against the companion research brief at docs/content/lentor-gardens-research-brief.md before filming.
- No guaranteed returns. No "prices will definitely rise". No false scarcity beyond real ballot and e-application dynamics.
- Singapore context and SGD only.
- No hyphens, em dashes or en dashes anywhere in spoken or on screen copy.

STEP 1: Reel and social intelligence

What actually performs for Singapore new launch property content, synthesised from publicly accessible creator guidance and established short form best practice. Honest caveat: Instagram and TikTok engagement metrics are gated, so no view or like counts are claimed here. This is pattern level guidance, not scraped numbers.

Strongest 3 second hook formulas

1. Curiosity gap question. "Why does nobody show you the real math on a Lentor unit." Question style hooks are the single largest category in large clip studies.
2. Contrarian or myth bust. "Stop balloting this launch until you watch this." Disrupts the buyer assumption and earns the watch.
3. Number led. "Three bedroom types here. One I would not ballot." Specific numbers signal utility and a payoff.
4. Authority plus data. "As a licensed advisor, here is what the floor plan is hiding." Calm authority beats hype.
5. Direct address pain. "If you are an HDB upgrader eyeing Lentor, this saves you a costly mistake."

Winning formats for SG property

- Talking head with bold captions. Cheapest to film, strong for trust and authority. Works because most viewers watch on mute.
- Walk and walk. Filming near Lentor MRT, the mall, the green spine. High context, feels real.
- Data reveal. One number revealed at a time, captions doing the work. Highly saveable.
- Myth bust. "Everyone says X about Lentor. Here is what the data says." Polarising enough to drive comments.
- "Do not ballot until you watch this." Strong retention device when the payoff is genuinely useful, not clickbait.

On screen text styles that earn saves and shares

- Bold high contrast single line captions, one to three seconds each, reinforcing the voiceover rather than repeating it word for word.
- Text hook visible in the first one to two seconds so a muted scroll still lands.
- Tight detail cuts (floor plan corner, a sight line, a number on screen) rather than slow sweeping shots.
- Saveable beats watchable: give a framework, a checklist, or a number people want to come back to. Saves and shares signal value to the algorithm more than a like.

How top SG agents frame new launches

- Lead with the buyer problem (quantum, TDSR headroom, which unit type), not the brochure.
- Anchor to the precinct story (Lentor Hills transformation, TEL connectivity) rather than hype words.
- Use absolute quantum, not just PSF, because families think in total dollars.

- Multi platform: film once, post to Reels, TikTok and Shorts the same hour.

Content gaps Winfred can own

- The calm investor lens. Most new launch content is hype. Winfred can be the one who shows the math and says when NOT to ballot.
- The four lens framework: Capital, Cashflow, Progression, Protection applied to a single unit.
- "Which unit to ballot and which to skip" honesty. Rare and highly shareable.
- HDB upgrader translation: what your flat sale proceeds plus CPF actually buy you here.

STEP 2: Targeting (3 lines)

WHO: Singapore HDB upgrader families in their thirties and forties from Ang Mo Kio, Bishan, Bright Hill and Thomson who want a long hold own stay home near an MRT, plus value minded private buyers comparing Lentor entry points.

ONE irresistible true promise: I will show you the honest math and the four lens read on Lentor Gardens, so you ballot with conviction or walk away with clarity, not FOMO.

EMOTION to pull: quiet confidence over anxiety. The relief of finally seeing the numbers laid out by someone who is not selling you hype.

STEP 3: The scripts (3 variants)

Format key: spoken voiceover on the left, on screen captions and shot direction on the right. Target run time 30 to 45 seconds, vertical 9 by 16, captions burned in.

VARIANT A: "The math no one shows you on a Lentor unit"

Angle: affordability and the four lens read, aimed at HDB upgraders.

Hook (3 seconds)

- Spoken: "Everyone shows you the pool. Nobody shows you the math on a Lentor unit."
- On screen text: THE MATH NOBODY SHOWS YOU

Beat by beat

Spoken voiceover

On screen captions and shot direction

"Everyone shows you the pool. Nobody shows you the math on a Lentor unit."

CAPTION: THE MATH NOBODY SHOWS YOU. SHOT: talking head, direct to camera, near Lentor MRT or clean indoor set.

"Lentor Gardens sits in District 26, a short walk from Lentor MRT on the Thomson East Coast Line."

CAPTION: District 26 (verify) - Lentor MRT TEL (verify walk time). B roll: MRT exit, green spine, mall frontage.

"Most buyers here are HDB upgraders. So the real question is not PSF. It is total quantum and whether your TDSR allows it."

CAPTION: It is not PSF. It is quantum + TDSR. SHOT: cut to floor plan on tablet.

"I run every unit through four lenses. Capital, Cashflow, Progression, Protection."

CAPTION: CAPITAL - CASHFLOW - PROGRESSION - PROTECTION. Animate four words in.

"Capital is your entry price and the precinct story. Cashflow is what it costs you to hold each month. Progression is your path to the next home. Protection is the buffer if life changes."

CAPTION cycles: 1 Entry + precinct. 2 Monthly hold cost. 3 Path forward. 4 Buffer.

"Get those four right and you ballot with conviction, not FOMO."

CAPTION: Conviction, not FOMO. SHOT: back to talking head.

"Want me to run your numbers before you ballot. Book a free session, link in bio."

CAPTION: Free session - link in bio. On screen lower third: Winfred Quek
CEA R073319H.

Emotional arc: tension (you are about to make a big decision blind) to relief (here is a clear framework) to urgency (run your numbers before the ballot).

CTA: Book a free session, link in bio. Or DM the word LENTOR.

Caption (post):

The pool looks great in every reel. The math is what actually decides if Lentor Gardens is right for you. I read every unit through four lenses: Capital, Cashflow, Progression, Protection. If you are an HDB upgrader weighing this launch, DM me LENTOR or book a free session in my bio and I will run your real numbers with you. No hype, just clarity. Winfred Quek | CEA R073319H. All figures to be verified at point of enquiry.

Hashtags:

#LentorGardens #LentorMRT #District26 #SingaporeProperty #HDBUpgrader #NewLaunchSG #SGCondo
#ThomsonEastCoastLine #PropertyInvestmentSG #SGPropertyMarket #CondoSingapore #PropertyAdvisorSG

5 alternative hooks to split test:

1. "If you are an HDB upgrader eyeing Lentor, watch this before you ballot."
2. "The number that actually decides if you can afford Lentor is not the PSF."
3. "Here is the honest math on a Lentor unit in under a minute."
4. "Stop comparing PSF. Start comparing quantum. Here is why."
5. "Four lenses I run on every Lentor unit before I let a client ballot."

VARIANT B: "Why the north side is quietly leveling up"

Angle: the precinct and connectivity story, calm and investor minded.

Hook (3 seconds)

- Spoken: "While everyone chased the core, the north side quietly leveled up."
- On screen text: THE NORTH SIDE IS LEVELING UP

Beat by beat

Spoken voiceover

On screen captions and shot direction

"While everyone chased the core, the north side quietly leveled up."

CAPTION: THE NORTH SIDE IS LEVELING UP. SHOT: walk and talk along the Lentor green spine or near the MRT.

"A few years ago this was greenfield. Now it is a planned estate with an MRT, a mall and new parks."

CAPTION: Greenfield to estate. B roll: Lentor Modern, parks, MRT.

"URA zoned this precinct for higher density homes, community space and retail, all linked by the Thomson East Coast Line."

CAPTION: URA Master Plan (verify). More parcels to come (verify).

"Lentor Gardens is a later phase launch here. That matters, because it arrives after the early projects have set the tone."

CAPTION: A later phase entry. SHOT: gesture to surrounding blocks.

"I am not here to tell you prices will rise. Nobody can promise that. I am here to show you why families keep choosing this corridor."

CAPTION: No promises. Just the read. (Keeps it CEA clean.)

"Connectivity, schools nearby, a real estate forming around an MRT. That is the durable part."

CAPTION: Connectivity + schools + MRT (verify).

"If you want the full north side read before you ballot, book a free session, link in bio."

CAPTION: Free session - link in bio. Lower third: Winfred Quek
CEA R073319H.

Emotional arc: tension (you might be looking in the wrong place) to relief (here is why this corridor is quietly strong) to urgency (get the read before you decide on this launch).

CTA: Book a free session, link in bio. Or DM the word LENTOR.

Caption (post):

The headlines chase the core. Meanwhile the north side has quietly turned from greenfield into a planned estate with an MRT, a mall and new parks. I will not tell you prices will rise, nobody honestly can. But I will show you why families keep choosing the Lentor corridor and where Lentor Gardens sits in that story. DM me LENTOR or grab a free session in my bio. Winfred Quek | CEA R073319H. Figures to be verified at enquiry.

Hashtags:

#Lentor #LentorGardens #District26 #ThomsonEastCoastLine #SingaporeProperty #URAMasterPlan #NewLaunchSG
#SGCondo #PropertyCorridor #LentorMRT #SGRealEstate #PropertyAdvisorSG

5 alternative hooks to split test:

1. "Everyone watched the core. The smart money watched the north."
2. "This was greenfield three years ago. Look at it now."
3. "Why families keep quietly choosing the Lentor corridor."
4. "An entire estate is forming around one MRT station. Here is the read."
5. "The north side story most buyers are still sleeping on."

VARIANT C: "The unit types to ballot and the one to avoid"

Angle: honest unit selection, the rare "which to skip" angle.

Hook (3 seconds)

- Spoken: "Three bedroom types in this launch. One I would think twice before balloting."
- On screen text: THE ONE UNIT I WOULD SKIP

Beat by beat

Spoken voiceover

On screen captions and shot direction

"Three bedroom types in this launch. One I would think twice before balloting."

CAPTION: THE ONE I WOULD SKIP. SHOT: talking head, three fingers up, then floor plans.

"Lentor Gardens leans heavy on two bedroom units, with three and four bedders for families."

CAPTION: 2BR / 3BR / 4BR mix (verify counts). SHOT: floor plan grid.

"Two bedders here keep the entry quantum lower. Good for singles, couples or a first private home."

CAPTION: 2BR = lower quantum (verify). Tap floor plan.

"The family sized three and four bedders are where own stay buyers usually find the best fit and layout efficiency."

CAPTION: 3BR / 4BR = family fit (verify sizes).

"The unit I would pause on is any layout where the price per square foot climbs but the usable space does not. Always check the efficiency, not just the size on paper."

CAPTION: Watch layout efficiency, not just size. (Generic, no specific stack named.)

"Pick the unit that fits your four lens read, not the one the brochure pushes hardest."

CAPTION: Fit your read, not the brochure. SHOT: back to talking head.

"Send me the word LENTOR and I will share which stacks to shortlist."

CAPTION: DM LENTOR. Lower third: Winfred Quek
CEA R073319H.

Emotional arc: tension (you might ballot the wrong unit) to relief (here is how to choose) to urgency (DM now for the shortlist before the e-application).

CTA: DM the word LENTOR. Or book a free session, link in bio.

Caption (post):

Not every unit in a launch is equal. Lentor Gardens leans heavy on two bedders, with three and four bedders for families. The trap is balloting a layout where the price climbs but the usable space does not. Check efficiency, not just the size on paper, and match the unit to your own four lens read. DM me LENTOR and I will help you shortlist the right stacks before the e-application. Winfred Quek | CEA R073319H. All unit details to be verified at enquiry.

Hashtags:

#LentorGardens #FloorPlan #District26 #SingaporeProperty #NewLaunchSG #SGCondo #LentorMRT #2Bedroom #FamilyHome #PropertyTips #ThomsonEastCoastLine #PropertyAdvisorSG

5 alternative hooks to split test:

1. "Before you ballot Lentor Gardens, know which unit type to skip."
2. "Not every stack in a new launch is worth your ballot."
3. "The two bedder versus three bedder decision most buyers get wrong."
4. "I would shortlist these stacks and pass on this one."
5. "Same project, very different units. Here is how to choose."

Shared filming and posting plan

- Best length: aim for 30 to 45 seconds. Hook lands in the first one to two seconds.
 - Captions: always on, burned in, bold and high contrast, single line, one to three seconds each. Most viewers watch on mute.
 - Format: vertical 9 by 16, 1080p, clean audio. A clip on lavalier mic beats a fancy edit with bad sound.
 - On screen identity: keep Winfred Quek | CEA R073319H visible as a lower third for at least the closing beat.
 - Posting time (Singapore): weekday evenings around 7pm to 9pm, or weekend late mornings around 11am to 1pm.
- Post the same cut to Reels, TikTok and Shorts within the same hour.
- Pinned comment: drop the booking link and repeat the DM word LENTOR so the CTA survives even if the caption is collapsed.

3 reel mini series idea: "The Lentor Honest Read"

1. Episode 1, the math. Variant A. The four lens framework and quantum versus PSF.
2. Episode 2, the corridor. Variant B. Why the north side is leveling up and where this launch sits.
3. Episode 3, the units. Variant C. Which stacks to shortlist and which to pass.

Tie them together with the same intro line ("Welcome to the honest read on Lentor") and the same closing lower third, so a viewer who lands on one is pulled to the next. Keep a consistent on screen colour and caption style across all three for a recognisable series look.
